STUART CONSULTING GROUP, INC.

ABOUT STUART CONSULTING GROUP

Stuart Consulting Group, Inc. (SCG) was founded in 2003 on the philosophy of client satisfaction and quality control. Our dedication to this philosophy enables SCG to provide services that meet our clients' needs within established schedules and budgets while exceeding their expectations with the final product. SCG firmly believes our strong focus on client satisfaction will always lead to quality results. That's why implementing high standards regardless of size or budget affords us the ability to stand by our motto:
WE START OUR WORKING WHEN THEY SAY NO.

OUR OFFICES

The SCG main office is conveniently located in Metairie, Louisiana, just minutes away from the Metro New Orleans area. We also have satellite and project offices throughout the Gulf Coast Area. Our engineers are licensed in several Gulf States which enables us to mobilize quickly and establish satellite offices, as needed.

OUR EXPERTISE

Stuart Consulting Group, Inc. (SCG) is a civil engineering, program management and grant management firm that focuses on a full range of services for the design and management of civil engineering, municipal public works and Federal and State funded grant projects. Our staff is comprised of highly qualified engineers, project managers and technicians whose comprehensive talent allows us to provide such dynamic services. Members of our staff have previously served in a variety of positions ranging from staff level engineer to Director of Public Works of a major metropolitan area. Currently, our staff is successfully providing design and management services to both our public and private sector clients. These services encompass all phases of the development, design and construction and close out of various projects ranging in cost from a few thousand dollars to over $50 Million.

WHY CHOOSE US

- Distinctive experience and innovative design concepts are what sets SCG above the rest.
- Our diversified design background provides a unique skillset that can be applied to an array of projects.
- Our staff is familiar with and successfully provides design and management services to both our public and private sector clients.
- Stuart Consulting Group, Inc. and staff collectively possesses over one hundred years of Program/Project experience.
- The firm has an excellent reputation in the engineering community, both with our peers and with the agencies we serve.

AWESOME TEAM

SCG encompasses dynamic engineers, planners, project managers, technicians, and administrators whose varied professional experience allows us to confidently compete with larger companies for major projects. Members of our staff have previously served in a variety of positions ranging from staff level engineer to director of public works in a major city, thus lending to extensive experience in the design, planning, management, and/or construction of several major projects throughout the Gulf Coast Region.

Design Team

Distinctive experience and innovative design concepts are what sets Stuart Consulting Group, Inc. above the rest. Stuart Consulting Group, Inc.'s diversified design background provides the professional skills needed to successfully design and bring to completion a broad range of projects. These projects include construction plans and specifications for roadways, airport runways and taxiways, fire stations, sewer lift stations, recreations facilities, drainage pump stations, underground utilities and flood mitigation

Management Team

Stuart Consulting Group, Inc. and staff collectively possesses over one hundred years of Program/Project experience, which includes Program Management of five of the largest natural disasters to affect the Continental United States --- Hurricanes Katrina, Rita, Gustav, Ike and Harvey. The combined budgets for these five disasters managed by members of our team are over $2.6B. SCG specializes in the following categories of management: Grants, Program, Project and Construction Management
